📍 Casablanca, Morocco

🌐 <https://www.samoudianas.dev>

Full Stack Developer with extensive experience building modern web applications using TypeScript, React, and Svelte ecosystems. Proven track record of architecting scalable solutions using various backend technologies including Firebase, Node.js, and Python Flask. Specialized in implementing secure payment processing, serverless architectures, and seamless frontend experiences. Demonstrated expertise in transforming design mockups into pixel-perfect applications while maintaining high performance and code quality standards.

## WORK EXPERIENCE

### Front End Developer

06/2024 - Present

KonCo - Remote

- Led migration of multiple websites from ThemeForest templates to Python Flask, enhancing site performance and maintainability
- Developed responsive web applications from Figma designs, ensuring pixel-perfect implementation
- Implemented custom animations and interactions using modern CSS and JavaScript frameworks
- Transformed Figma wireframes into production-ready websites while maintaining design fidelity
- Optimized website performance through efficient coding practices and modern development techniques

### Fullstack Software Developer

06/2023 - 06/2024

Tajdeed.io - Remote

- Architected and maintained multiple SvelteKit applications integrated with Node.js and Stripe for automated invoice processing
- Implemented Firebase and Google Cloud infrastructure for database management and application deployment
- Developed serverless backend functions on Firebase to handle complex business logic and data processing
- Built a Progressive Web Application (PWA) using Next.js and TypeScript, leveraging Supabase for backend services
- Engineered full-stack TypeScript solutions across multiple platforms, ensuring type safety and code reliability

### Fullstack Software Developer

09/2022 - 06/2023

LauchEffect.io - Remote

- Customized and implemented ThemeForest templates to create tailored web solutions
- Developed full-stack application using Next.js, TypeScript, and React Context/Redux for state management
- Integrated Firebase and Node.js backend services with Stripe payment processing
- Implemented automated deployment workflows using Netlify for continuous integration
- Architected scalable frontend solutions using modern React patterns and TypeScript

## TECH STACK

- **Frontend:** JavaScript/TypeScript, React.js, Next.js, Svelte, SvelteKit, Redux, React Context, CSS Animations, Responsive Design, Figma Implementation, Unit testing, Jest, React testing library, Cypress
- **Backend:** Node.js, Python Flask, Firebase Cloud Functions, Serverless Architecture, RESTful APIs
- **Database & Cloud:** Firebase, Supabase, Google Cloud Platform
- **Development & Tools:** Git, TypeScript, Netlify, Stripe Payment Integration

## EDUCATION

### Computer Science

University of Chouaib Doukali

Software Engineering

08/2019 - 06/2021
